STEP 1 : ULTRASONIC SKIN SCRUBBER: This blade like handpiece uses strong Ultrasonic pulses which smoothens the skin by vapourizing dead skin cells , free radicals and other impurities making Skin Permeable to penetrate skin nourishing nutrients.

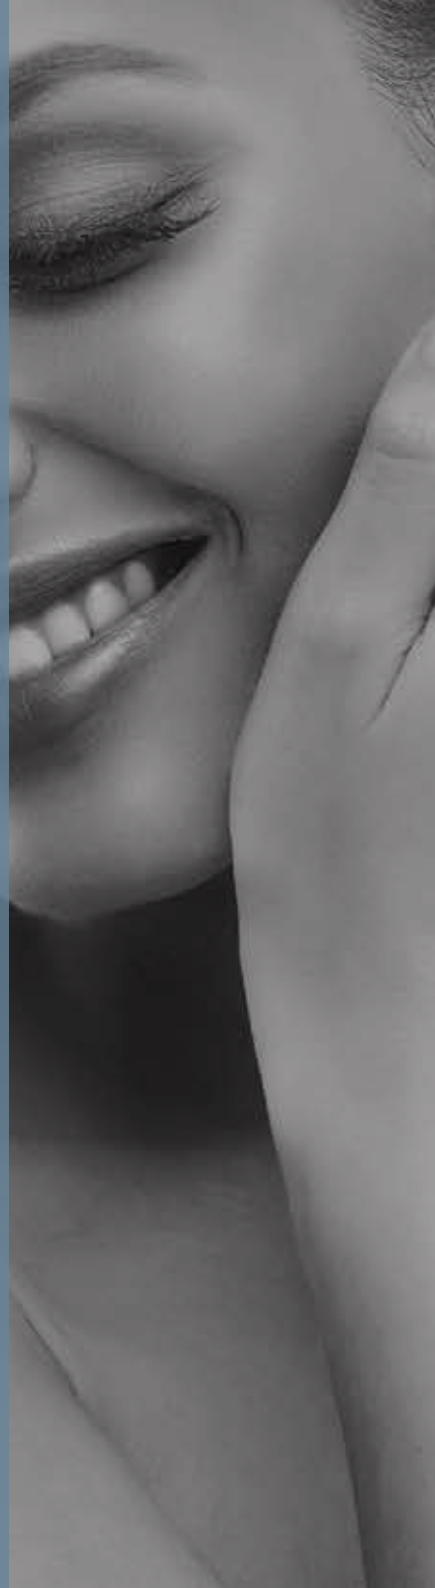

STEP 2 : HYDRO H₂O₂ HANDPIECE: This handpiece works in conjunction with some Exfoliating and skin nourishing serums, The combined effect of Vacuum suction, Abrasive circular tip and exfoliating serum extract the dead skin black and white heads on the epidermis making it silky smooth.

STEP 3 : JET MESO: Delivers essential skin nourishing Nutrients with Jet Power, These products penetrate the thirsty skin without needle or pin prick .

STEP 4 : ULTRASONIC INFUSER: Ultrasonic opens up the drug delivery channels , driving the Skin Nurturing and Hydrating products deep within deep dermis

STEP 5 : SUPER CELL RESONATOR: As we begin to age , the cells stop resonating and therefore Skin hydrating and antiaging enzymes are not released naturally. This Technology resonates a SIGNAL which resets Cellular frequency so that the Skin naturally produces skin hydrating and nurturing enzymes , keeping it young and glowing always.

STEP 6 : ICE PRESS HANDPIECE: This is the Last STEP which is like an ICE COLD PRESS that ensures the aggravated skin calms down and further contracts the open pores, Giving skin a SUPER GLOW and an rejuvenated appearance
